Mumbai, Maharashtra, India

Summary

Hello,

After 12th I decided to do engineering in IT, but just because of 2 marks less in entrance exam(CET)

I was not eligible to get the admission in IT and I ended up getting admission in Mechanical.

Mechanical became much interesting field for me to built the analytical skill. During college I came across machine design software's like AutoCAD and Solid works. I was only in my 2nd year when the pandemic broke and the entire nation and world went into a lockdown. That gave me plenty of time to explore new things and enhance my creativity. It led me to explore design. So I joined Milestone Institute to learn AutoCAD and Solid works.

But because of pandemic I didn't have much knowledge about practical work and also there was not higher chances of job in Mechanical. I decided to switch my career as web developer, I have always interested in IT field.

After my graduation I was eagerly searching for a good web development course and I came across an advertisement and when I did some research about the institute, I found the course really interesting. Soon after I enrolled myself in full stack web development course (by Masai School).

Currently I am working as Software Developer in Tezminds.

Experience

TezMinds Software Pvt. Ltd.
Software Developer
September 2023 - Present (1 year 10 months)
Pune, Maharashtra, India

IKS Health

Junior Revenue Cycle Representative

June 2022 - September 2022 (4 months)

Navi Mumbai, Maharashtra, India

My first job after graduation was in IKS Health as a Junior revenue cycle representative. It was a great experience to be a part of it. Learned basic of about how health insurance works in the US. IKS Health is a company that helps US doctors to get their payment from health insurance. I realized that my strengths and weaknesses were not aligned with the requirements of the post. I decided it was best that I left at the earliest and started to hunt for more relevant opportunities.

Education

Masai

Full Stack Web Development, Information Technology · (September 2022 - July 2023)

Thakur College of Engineering & Technology

BE, Mechanical Engineering · (2018 - 2022)
